### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3 is rejected under 35 U.S.C. 102(e) as being Powell 2003/0222447.

Powell discloses a vehicle comprising:

a frame 12, first and second drive wheels 16 coupled to said frame along a horizontal axis, each of said drive wheels designed and arranged to be capable of powered clockwise and counter-clockwise rotation independent of the other, first and second support wheels 16 mounted to said frame, each of said support wheels designed and arranged to be capable of freewheel rotation about an independent horizontal axis and freewheel swiveling about an independent vertical axis, at least one control mechanism arranged and designed to control the direction of rotation and the speed of said first and second drive wheels, and a pintle hitch assembly 38 coupled to said frame, disposed generally centered between said first and second drive wheels above said horizontal axis, and designed and arranged to mate with a semi-trailer.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Powell in view of Cook et al. 6,668,471.

Powell discloses the claimed invention except for a cab enclosing the seat.

It is old and well known in the art, for example as shown by Cook et al., to enclose an operator seat of a vehicle with a cab 1 in order to protect the operator from inclement weather.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Powell by enclosing the seat with a cab, in view of Cook et al., in order to protect the operator from inclement weather.

***Allowable Subject Matter***

5. Claims 2, 4-7, 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose zero turn radius vehicles.
